SYNOPSIS

- Well versed in both **design** and **coding** allowing for seamless integration between these skill sets.
- Knowledgeable and has experience in most types of languages: **Scheme/Racket** (Functional), **Java** (Object-Oriented), **C** (Procedural).
- Plenty of experience in Web Development having worked on both front-end with **HTML** and **CSS**, and back-end with **Linux**, **PHP**, **Javascript** and **MySQL**.

MAJOR PROJECTS

Conlingo
Independent Startup

📅 Dec 2015 - Dec 2017

- Conceptualization and development of a service that adopted a Uber-like model for regional/intercity shipping.
- Contracted and directed third-party developers to create the mobile platform for the service.
- Used **HTML**, **CSS**, **Javascript** and **Bootsrap** to create a control panel and a launch page.
- Used **MySQL**, **PHP** and **Java** to create a working backend for the control panel and the mobile application.

Masterpreneur
Case Competition

📅 Oct 2016- Feb 2017

- **Group project** created for the international case competition DECA.
- Had the purpose of promoting entrepreneurship to our community.
- Hosted multiple presentations in our school's business classes to help promote a deeper understanding of entrepreneurship.
- Achieved **3rd place** in Ontario and went on to compete internationally in Anaheim, CA.

EXPERIENCE

Math and English Tutor
Kumon Math & Reading Centre

📅 Feb 2016 - Sept 2017   📍 Kanata, Ontario

- Guided students in their classwork for grades K-12.
- Graded homework and classwork and searched for discrepancies between the two.
